We tried this method on our old Pixel 3a and, interestingly, the mid-range phone is able to remove objects or people from the background. To use Magic Eraser, open the Google Photos application and open any image you want to edit using Magic Eraser. If you want to delete all suggested sections from your photo, you can tap the Delete All option within the Suggestions option found ticker at the bottom. If an image shows several suggestions to delete and you only want to delete some of them, you can click on the Delete All option, just click on the highlighted item or people you want to delete. For a cross-platform photo viewer, Google Photos is pretty ingenious when it comes to making small adjustments to your images from inside your phone. Depending on your image, you can see the Magic Eraser option appearing here. Once you have removed all the unwanted objects from the image, you can tap on Done at the bottom right corner. Once you have saved your changes, you can save this edited image as a copy on your Pixel device by clicking on the "Save Copy" button on the bottom right corner. The edited image now won't have anything to wish for. Correct #2: Upgrade Google Photos to the latest version of Play Store If you can't access the Magic Eraser option as we've shown above, there's a chance that the Google Photos application on your Pixel 6 is out of date. upgraded. However, there is a possibility that the feature will be implemented on older Pixel devices, according to previous instances. To do this, go to the part of the image where you want to remove an object. You also have the option of removing things manually by brushing them or drawing a circle over them. While such technology has existed in the past with the help of Photoshop and Snapseed applications, Magic Eraser makes sure that even that are "AA to particular technology, you can also use it to remove distractions from a photo. These unwanted items may include objects that want to appear in your picture, people in the background or other distractions that may take the focus away from you or the subject you want to capture. When you first load the magic eraser into an image, it will automatically detect the elements. You may want to remove (using machine learning) and suggest them as highlights. In the results, select the Google Photos app and then tap the "-UPDATE" button on the next screen. Alternatively, you can use this Play Store link to get to the Google Photos app app directly at its 6 pixel. Fix #3: Install Google Photos app version 5.64 manually If you are still unable to use the Magic Eraser feature on your Pixel 6 after upgrading to its latest version, there is only one way to work with this feature "Install version 5.64 of the Google Photos app Google Photos application manually. Although the process may not be as smooth as in pixel 6, it only takes a couple of seconds in total to delete unwanted items. Does the magic eraser show up in all the photos? As you may have noticed in the "FIX #3" section above, we were able to use Magic Eraser on a Pixel 3A after sidelading the latest version of Google App on the device. You can repeat this manual, removing the step to delete other elements from an image. If the Google Photos app isn't highlighting all the unwanted items in an image, you can still remove them manually. On this edit screen, swipe left through the tabs until you reach "TOOLS." Click on the "TOOLS" tab at the bottom and you should be able to see the "Magic Eraser" option there. When you detect an unnecessary item, brushed over it or a draw a circle around it. The application will now process this area of the image, find out what you are trying to delete, and delete it from the Magic Eraser is the last way to use the computational photograph to make your photos special. In this way, you can use. use. diordnA gninnur ecived lexiP yna no skrow osla KPA emas eht .ylgnisirpruS A A.yawathgiarts esu ot ydaer eb diuow loot resarE cigamE eht .aliov dna ppa sotohP elgooG gnitsixe eht ot etadpu na sa jgnidaoleis yb(ti llatsni dna ecived lexiP ruoy no)erutaef siht evah taht ecived seires 6 lexiP eht no dnuof eno eht(A Aelif KPA cificeps siht daolnwod .taht roF A A.6 lexiP no resarE cigamE gnixif tuoba wonk ot deen uoy lla sAAActaht A A.sMEO rehto morf senohp diordnA no sotohP elgooG rof loot resarE cigamE eht sesaeler elgooG taht ylekilnu sAAActi .reweoH .secived lexiP rieht no erutaef wen siht tops ot gniyrt emit drah a dah evah sresu .reweoH .erehwesle ti dnif llits nac uoy .yrow tAAAnod .ton fi .mottob eht ta nepo bat AAAsnoitsegguSAAAc eht ees lliv uoy .sreappa neercs gnitide eht nehW A A.mottob eht ta noitpo AAAtidEAAAc eht no pat .sreercliluf ni pu sdaol eruticp detceles eht nehW 76 lexiP no ylno krow resarE cigamE seod A A.oga sraey lareves dekclic evah yam uoy taht seno eht neve .saremac dna senohp rehto no derutpac evah uoy seruticp morf elpoep dna stcejbo de'nawnu evomer ot loot resarE cigamE eht esu nac uoy .snaem siht .erots yalP no ppa sotohP elgooG eht fo noisrev tsetal eht ot etadpu ot evah lIAAAeuoy .loot resarE cigamE wen eht teg oT .ppa sotohP elgooG ruoy nhtiw morf ti ssecca ot woh dna erehw wonk ot tnaw tsrif yam uoy .6 lexiP elgooG wen ruoy no loot esarE cigamE eht evah tAAAnod uoy taht emussa dna daeba og uoy eroteB sotohP elgooG edisni resarE cigamE esu ot yaw thgir eht wonK :1# xif A A.krow ti teg ot sexif gnivolof eht ta kool a ekat yam uoy .sotohP elgooG edisni loot resarE cigamE wen eht esu ot elba neeb tAAAnevah uoy tub seires 6 lexiP na nwo uoy fi ?6 lexiP no resarE cigamE si tahW A A.enohprams seires 6 lexiP ruoy no eussi ebaliava ro gnivohs ton AAAsresarE cigamAAAc eht xif yam uoy woh nialpxe lIAAAew .isop siht ni yhw sAAActaht .ecived lexiP redlo na no neve .seruticp ruoy morf snoitcarsid evomer ot resarE One of those exclusive features that was launched with the Pixel 6 series is Magic Eraser, a tool that eliminates unnecessary elements of your image to make it perfectly.
